## CALMARE PAIN RELIEF THERAPY

Calmare Therapy is an FDA cleared treatment that provides safe, effective and non-invasive relief from chronic neuropathic pain. Calmare Therapy offers relief to patients who have grown resistant to morphine and other pain medications. Calmare Therapy is NOT traction, TENS, manipulation, acupuncture, hypnosis, biofeedback or NMES. This treatment is not a substitute for surgery, nor does it treat physical, mechanical problems. Because it relies on brain activity to be fully successful, it is not suited for patients who are being treated with neuroleptic medications. Implanted pain stimulators, pacemakers and epilepsy are contraindications for Calmare Therapy.

**Conditions It Treats:** RSD/CRPS, Sciatic Neuropathy, CIPN, Diabetic Neuropathy, Post Surgical Pain, Pudendal Neuropathy, Lyme Related Neuropathy, Post Herpetic Neuropathy and other types of neuropathic pain.

## BEMER TECHNOLOGY

In just eight minutes, twice per day, BEMER, an FDA Registered Device, has been scientifically proven to enhance specific characteristics of blood flow, ensuring that the cells of your body not only remove unwanted waste but replace that with vital oxygen and nutrients needed to metabolize correctly. BEMER's patented signal optimizes our smallest blood vessels, enabling the enhancement of blood flow. As a result, the body's cells become stronger and healthier and better able to perform their various functions.

**Benefits of Bemer Include:** Increased Endurance, Strength and Energy, Improved Sleep Management, Faster Healing from Injury or Sports Training.
